

PURSEJEWELRY.COM

Let's Work Together

Working alone we'll survive, working together we'll thrive!

In May of last year, PurseJewelry.com partnered with First Data to provide credit card services to its clients. First Data is the largest merchant processor in the world and services our country's leading retailers. Our First Data representative shared a program (Interchange Plus) with us that is normally reserved for large merchants and would like to offer it to customers of PurseJewelry.com. We were very excited to see the savings on our monthly statements and we're proud to offer the same program and savings to our customers.

Tony Valenzuela has provided his information below. Feel free to contact him at any time and he will explain the program, the savings and the services at a convenient time and place for you.

Interchange Plus

This program takes the guessing out of credit card services. With Interchange Plus, merchants know what their monthly bill will be, they don't worry about hidden fees and they share the benefits usually reserved for larger Merchants.
